

Hide Slides

A hidden slide will not be displayed when in Slide Show view. You can, however, still see it in the Slide Sorter and Normal views.

In either Slide Sorter or Normal view, right-click on the slide you want to hide.

Select **Hide Slide**. The number associated with the slide will be crossed out to indicate that it is hidden.

To **unhide** the slide, right-click on the slide and select **Hide Slide**. The slide number will no longer be crossed out.
